

Optional eLearning Activities

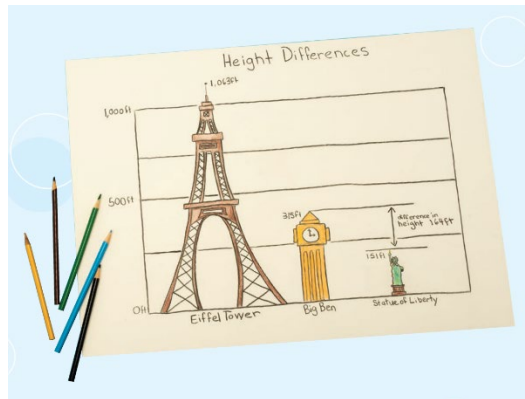

Grades 3, 4 and 5

Math

Friday, April 10th

Monumental Heights

- Let's graph heights...of gigantic buildings.
 - Choose 3 – 5 famous buildings.
 - Research the buildings to find their heights. Order them from tallest to shortest.
 - Make a bar graph you can use to compare the buildings' heights.
 - Draw a picture of each building on the bar graph (an example is below). Be creative!

Monday, April 13th

Monumental Heights – Create Your Own Problems

- Use the data in your Monumental Heights Bar Graph to find the differences in heights of the buildings you chose.
- Write and solve other addition and subtraction problems using the graph you made. Have members of your family use information from the graph to solve the problems that you created.
